An Iran-based raw material trading company

We supply raw materials to manufacturers and wholesale buyers abroad. We buy at origin, arrange freight, clear customs and deliver at destination - so what you receive is the goods, not a file of documents to resolve yourself.

Why buyers work with us

Direct producer network

We buy straight from producers, not intermediaries.

Checked before it ships

We attend loading and inspect packing at origin.

Payment handled

Settlement arranged even where banking channels are limited.

The chain we cover

01 Sourcing at origin

Bought direct from producers on quality, price and lead time.

02 Pre-shipment inspection

We attend loading and check packing against the specification.

03 Freight & vehicle selection

Route and vehicle chosen for the commodity - road, rail or multimodal.

04 Customs clearance

Export and import formalities handled on your behalf.

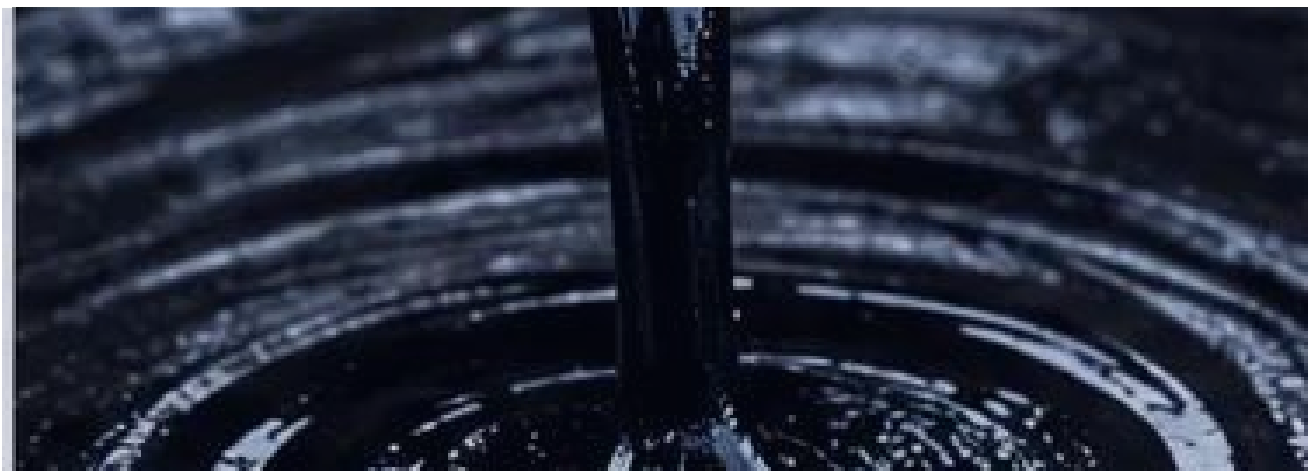

05 Delivery at destination

Followed through to the agreed delivery point.

06 Payment & settlement

Arranged per transaction, including hard-to-bank markets.

Energy & Bitumen

Bitumen export supply with a current focus on Uzbekistan and qualified regional buyers.

Bitumen exports

Export

Supply for Uzbekistan and other regional opportunities based on agreed specification and availability.

Specification matching

Specs

Grade, packaging, and commercial requirements are confirmed against each inquiry.

Logistics planning

Logistics

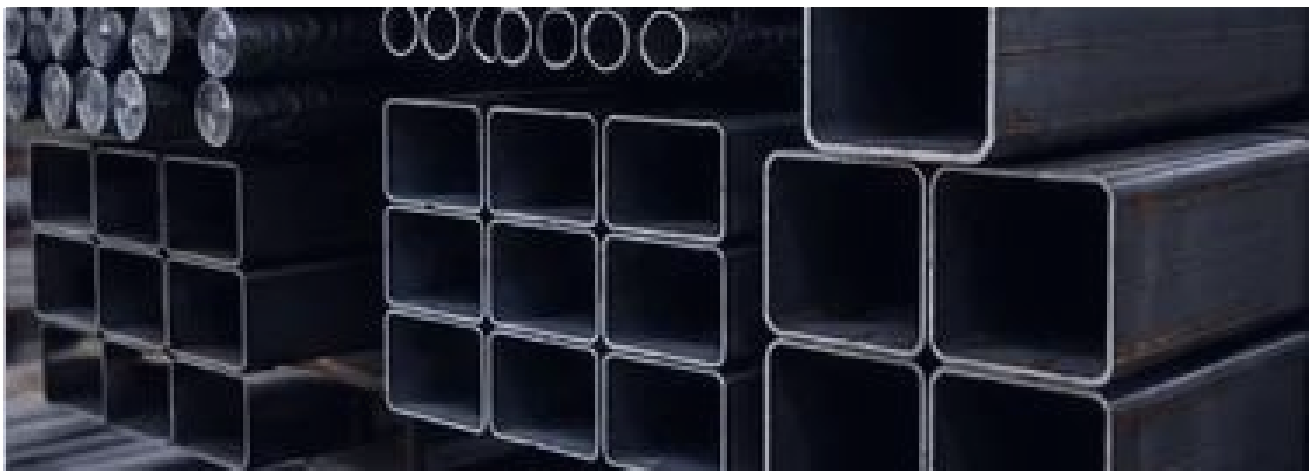

Route and shipment mode are selected according to destination, volume, and delivery terms.

Commercial quotation

Trade

Quotes are structured around quantity, destination, required specification, and Incoterm.

Metals & Steel

Iron and steel products for buyers across Central Asian markets.

Product scope

[Products](#)

Iron and steel products sourced and supplied according to the buyer's requested category.

Specification matching

[Specs](#)

Dimensions, grade, standard, and quantity are aligned before commercial confirmation.

Supplier coordination

[Sourcing](#)

Available supplier options are evaluated against specification, timing, and commercial terms.

Regional delivery

[Export](#)

Export planning is organized for Central Asian destinations on a transaction-by-transaction basis.

Agricultural Commodities

Barley from Russia alongside pulses, grains, and selected agricultural commodities.

Barley from Russia

Barley

Russian-origin barley sourced for import based on required specification and volume.

Pulses & grains

Agriculture

Pulses and grain opportunities remain part of the wider agricultural trading portfolio.

Quality requirements

Specs

Commercial specifications and inspection requirements are agreed before purchase confirmation.

Supply planning

Supply

Spot and repeat requirements are evaluated according to origin availability and destination.

Textile Raw Materials

Silk yarn imports and specification-led sourcing for textile raw materials.

Silk yarn imports

Silk Yarn

Silk yarn is sourced for import according to the buyer's required specification and quantity.

Specification matching

Specs

Count, quality, packaging, and other technical requirements are confirmed per inquiry.

Supplier coordination

Sourcing

Supplier offers are compared against quality, commercial terms, and delivery requirements.

Import execution

Import

Commercial and logistics steps are coordinated from supplier confirmation through delivery.

Chemicals & Petrochemicals

Chemical and petrochemical raw materials supplied to manufacturers against a confirmed technical specification.

Petrochemical raw materials

Petrochemicals

Polymer grades, base chemicals, and related feedstock sourced directly from producing plants.

Industrial chemicals

Chemicals

Chemical raw materials for production, matched to the buyer's technical specification and required purity.

Specification & documents

Specs

Technical data sheet, certificate of analysis, and packaging requirements are confirmed before purchase.

Delivered supply

Delivered

Purchase at origin, freight, customs clearance, and delivery at the agreed destination.

Markets and representatives

Our trade is built on specific origin and destination relationships, with a local contact in each key market rather than a handoff to a stranger.

Uzbekistan

Destination market for our bitumen exports.

Kazakhstan

Steel exports and grain sourcing across the corridor.

Russia

Sourcing market for barley and agricultural commodities.

Other regional markets

Evaluated case by case on product, route and terms.

How a trade starts

- 1 You send the commodity, specification, quantity and destination.
- 2 We find the supply and quote a delivered price.
- 3 Price, payment and delivery terms agreed in writing.
- 4 Loading inspected at origin, transport booked.
- 5 Cleared through customs and handed over at destination.

GET IN TOUCH

Tell us what you need to buy or sell

Send the commodity, required specification, quantity, destination and your target timeline, and our trade desk will come back with a delivered price.
